

Technical Committee Report for the Winter Assembly

This is more of a preview rather than a report because the technical committee exists but four of its six members won't be appointed until the next rotation begins. In the meantime, we'd like to know who might be interested in serving on the technical committee. There are three positions available, so those interested can email me at webmaster@aa-nia.org. Please include your background in technology and how you'd like the committee to serve the area and AA. This is very informal, so there's no need for resumes or elaborate applications. To refresh our memories I've posted the motion on the new technical committee web page.
